

**Saving Fish**

**Biotec** biotec.com.au  
Dont dump fish & plants into waterways

Millions of fish like Nemo die prematurely from improper care. Seek advice from stores & Biotec web site.

- o You'll need to spend time, money, and energy to keep them alive and healthy.
- o Choose your fish to ensure they get along well.
- o Rinse everything that's going in your aquarium with tap water.
- o Float the bag your new fish comes home in, in the aquarium for a few minutes to allow the water temperatures to equalize.
- o Feed your fish small amounts of Biotec food 1 to 3 times a day. Dont overfeed.
- o Check daily to make sure all fish are present & healthy.
- o Ensure filters are working and the temp & water parameters are in the right range.
- o Apply natural Biotec Bio & water conditioning products for healthiest fish
